

## PRODUCT RELEASE

---

### **Sound Shower 2 Directional Speaker is Here!**

**With several new improvements and benefits.**

- New and improved amplifier design with more sound pressure level to accommodate even the most challenging operational environments
- New and improved Panphonics Audio Element with significantly higher temperature and humidity tolerance
- USB power-out connector for the external players like mp3 to be used in applications where continuous independent media is needed
- Integrated virtual bass feature built into the amplifier to guarantee the ultimate hearing experience
- Sound Shower 2 combines the benefits from the SoundSign and the SoundShower: one product can be used in all applications, installed both vertical and horizontal way

During the last years our technology has conquered various applications like digital signage, museums, corporate lobbies and privacy usage in banks, hospitals, pharmacies etc.

We are happy to support you with more information, please don't hesitate to contact your Panphonics representative.

The products are ready to ship right away!

**HEAR THE POWER OF THE SOUND SHOWER!**
